Medical education Clinical Immersion

Day-Stay Total Laparoscopic Hysterectomy

This Clinical Immersion, led by Dr Graeme Walker and supported by his anaesthetic and nursing team, incorporates a half day of Total Laparoscopic Hysterectomy case observations preceded by a dinner with presentations on the ERAS protocol, patient selection, pre-op/post-op care and theatre/recovery logistical considerations. The attending team of up to 6 are matched with their counterparts (Surgeon, Anaesthetist, Scrub scout and Recovery Nurse) to follow them from booking, through Surgery, to recovery and discharge enabling them to fully understand the intricacies of implementing such a program in their own hospital. Upon request, where schedules allow, Dr Walker and his CNC can follow up with course attendees in an informal or more formal proctoring session to assist in getting a local service up and running. The course is suited to Public Gynaecological surgical services that are ready for the same day protocol shift or teams looking to improve theatre efficiency, and improving the experience for Women that undergo the procedure and is truly world-class
